## SUMMARY

Highly motivated and skilled Computer Engineering graduate seeking a challenging role. Proficient in programming languages such as Python, with experience in web technologies such as Node.js, Express.js, and React.js. Strong problem-solving and communication skills.

## WORK EXPERIENCE

### ENIGMASOFT TECHNOLOGIES
**Software Developer Intern** — August 2022 - October 2022

- Developed a full stack web application where users can list their products for sale. The website has an advanced authentication system with registration, login, forgot password, reset password and logout functionalities.
- Worked with technologies such as Node.js, Express.js, MongoDB, React.js, Redux, Git, Heroku and more.

### SERVITUDE TECHNOLOGY
**Web Developer Intern** — December 2021 - February 2022

- Directly interacted with clients and created portfolio websites for their business or company.
- Worked with web technologies such as HTML, CSS, MySQL, PHP, Javascript, Bootstrap.

## EDUCATION

### GOA ENGINEERING COLLEGE
**Bachelor of Engineering major in Computer Engineering** — July 2019 - June 2023 — CGPA: 9.52

## PROJECTS

**SoulMate - An Online Dating Website**

- A full stack web application that allows users to find a partner.
- It includes features such as authentication, creating and editing profile, recommendation of potential partner and chat.
- Technology used was Javascript, PHP, Bootstrap, MySQL.

**Twitter Dataset Generator based on Keyword**

- Fetch and provide tweets based on the entered prompt such as a hashtag.
- Used Twitter API for fetching data.
- Built using Python Flask Framework.

## ACHIEVEMENTS

**INSPIRATHON 2022 WINNER** [HACKTHON]

- Our team created a web-based all in one app for managing a faculty student related data.
- It includes features like an AI note maker, books and other reference material recommendation, attendance tracker, one to one and group based chat room.

**PIXEL PERFECT 2022** [UI/UX HACKTHON]

- Created a web based design of an online recruiting platform for improving onboarding process for jobs and internships.
- Developed a case study including strategy, competitive analysis and user persona.

## SKILLS

**Programming Languages:** Python, C++, SQL
**Frameworks / Libraries:** Node.js, Express.js, React.js
**Databases:** MySQL, MongoDB
**Web Technologies:** HTML, CSS, Bootstrap, Javascript
**Tools:** Git, Visual Studio Code, Figma
